INNOVATIONS **AT MATPOL**

At Matpol, we focus on innovation and that's why we were the very first in Poland to introduce a method of producing Christmas trees, using durable C-Ring staples.

WHAT IS **C-RING** TECHNOLOGY

The key stage in the Christmas tree production process is to attach each, even a single twig in such a way that the created connection is durable, safe and aesthetic. At Matpol, we do it with using C-Rings. The C-Rings are made of extremely durable material. Despite their miniature size, enormous strength is needed to bind the twigs permanently. We use the most modern machines on the market for crimping C-rings. It is very important that our C-rings do not have sharp edges. Thanks to such solution, it simply make use of all Matpol Christmas trees completely safe!

DURABILITY

C-rings, tightened with great force, ensure that the Christmas tree will last for many years.

STABILITY

Durable and stiff material makes the C-Ring attachments increase the stability of the entire tree structure and each single twig, too.

AESTHETICS

At Matpol, we produce green C-Rings. So that's why they fit perfectly into the whole twig.

LOW MANUFAC-TURING COST

As a result, Matpol Christmas trees are cheaper compared to Christ-mas trees made with a different technology.

HANDMADE

We know that high-quality handmade products are terribly difficult to find in the flood of mass production that surrounds us. Each decorative element in our Christmas trees is prepared by hand by members of our team. Although it may be hard to believe, every snowflake on our trees is the unique creation of our employees.

A WIDE RANGE OF ARRANGEMENTS

Thanks to the strong type of attachment, we have increased the scope of arranging the Christmas tree. You can bend the twigs in all directions without worrying about the durability of the entire bond.

SAFETY

Matpol C-rings have rounded edges. Thanks to this, we have increased comfort and safety for your hands even more when folding or unfolding the Christmas tree and decorating it.

Come and see for yourself
that an artificial Christmas tree
can look like a real one!

Sales leader in Germany on the Amazon platform.

We have been on the market for **30 years.**

We develop our own **innovative production technologies.**

We are constantly introducing **new products.**

ABOUT **MATPOL**

OUR **HISTORY**

1. BEGINNINGS

Matpol is a family-owned company that has been operating on the market since 1992. From the very beginning, we have been consistently developing our business, growing from smaller-scale production into one of the recognizable manufacturers of artificial Christmas trees on both the Polish and international markets. Today, we have an advanced production facility and extensive experience that allow us to fulfil large orders for retail chains as well as projects tailored to the individual needs of our clients.

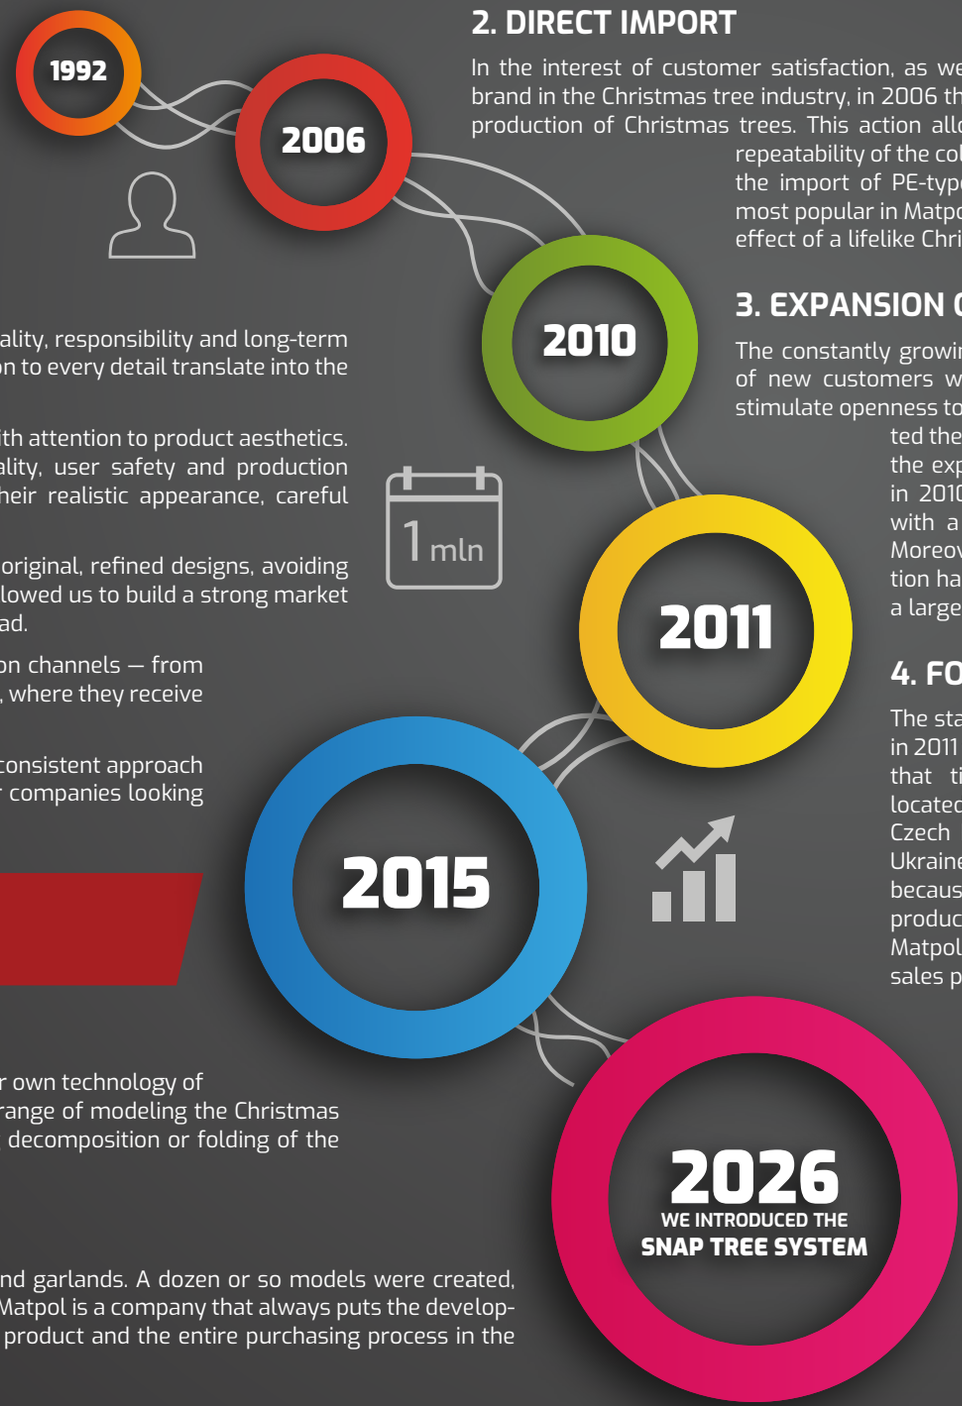

As a family company, we base our business on values such as quality, responsibility and long-term relationships. We believe that consistency in our work and attention to every detail translate into the trust placed in us by our business partners.

Our strength lies in combining modern production technologies with attention to product aesthetics. We continuously develop our own solutions that improve quality, user safety and production repeatability. As a result, our Christmas trees stand out for their realistic appearance, careful finishing and high durability.

Since the beginning of our activity, we have focused on creating original, refined designs, avoiding repetitive patterns and copying competitors. This approach has allowed us to build a strong market position and earn the trust of customers both in Poland and abroad.

Matpol products are successfully sold through various distribution channels — from traditional retail chains to the rapidly growing e-commerce sector, where they receive very positive feedback and customer reviews.

Many years of experience, our own technological solutions and a consistent approach to quality make Matpol a stable and reliable business partner for companies looking for proven products in the Christmas category.

2. DIRECT IMPORT

In the interest of customer satisfaction, as well as the desire to create a significant brand in the Christmas tree industry, in 2006 the company began importing foil for the production of Christmas trees. This action allowed to maintain the high quality and repeatability of the color of Christmas trees. At the same time, the import of PE-type twigs began. They are currently the most popular in Matpol Christmas trees because they give the effect of a lifelike Christmas tree.

3. EXPANSION OF THE HEADQUARTERS

The constantly growing sales and the successive acquisition of new customers were a powerful dose of inspiration to stimulate openness to new challenges. The successes motivated the owners to make a bold decision to start the expansion of the company's headquarters in 2010. At that time, a new company office with a 300 m2 showroom was established. Moreover, the new warehouses and production halls have been adapted to accommodate a large number of employees.

4. FOREIGN MARKET

The start of cooperation on the foreign market in 2011 was a huge success for the company. At that time, the recipients were companies located in countries such as: Germany, the Czech Republic, Slovakia, Russia, Belarus and Ukraine. It was a great achievement not only because the company started exporting its products, but also because thanks to this Matpol trees were sold on the most popular sales portal - Amazon.

5. OWN TECHNOLOGY

Constantly improving the production process, we have created our own technology of connecting twigs with C-Ring staples. The advantage is the wide range of modeling the Christmas tree and 100% safety, reducing the likelihood of any cuts during decomposition or folding of the Christmas tree.

6. EXTENDING THE OFFER

From 2020, the company has expanded its offer with wreaths and garlands. A dozen or so models were created, which from the very beginning turned out to be another sales hit. Matpol is a company that always puts the development, needs and expectations of the customer in relation to the product and the entire purchasing process in the first place.

OUR **CUSTOMERS**

Continuous improvement of our products, supported by over 20 years of valuable experience in the industry and intensive development of the production process, have made our products desirable in many European countries. We sell most of the Christmas trees on the German market, where the highest quality and design is a priority. That's where we gained the highest recognition – we are the sales leader on the Amazon platform.

Our products reach many countries and districts all over the world. Among them there are:

Germany,
Slovakia,
Belgium,
Italy,
Romania,
Poland,
the Netherland,
the Czech Republic.

Our recipients are also domestic and international trade networks.

MANUFACTURE

MATERIAL

Since 2006, we have been a direct importer of PVC foil used for the production of Christmas trees. For several years, we have been able to test the quality of materials from over hundreds of manufacturers from several different countries. This allowed us to establish cooperation with the best of them. Every year we import about 40 containers of PVC film and PE twigs. The volume of orders and the lack of intermediaries allows to reduce production costs, and thus the price of the final product. We have certificates for imported materials. In addition, the foil that we use to make Christmas trees is non-flammable! Since 2015, we have been a producer of green C-Ring staples for sewing Christmas tree twigs.

TECHNOLOGY

We have about 40 machines, including:

- tip cutting machines,
- paint shops where we snow, decorate and paint trees,
- the most modern C-Ring staplers on the market,
- and many more.

Production automation guarantees exceptional precision and repeatability. Our customers can be sure that when they see the Christmas tree in the picture, they will receive exactly the same product, no matter which batch it is from.

PEOPLE

You can pick Christmas trees up yourself. We will wait for your transport even on the weekend. Also, you can let us deliver them to any address in the world. Many years of close cooperation with shipping companies allows us to offer very favorable prices for transport services.

LOGISTICS

You can pick Christmas trees up yourself. We will wait for your transport even on the weekend. Also, you can let us deliver them to any address in the world. Many years of close cooperation with shipping companies allows us to offer very favourable prices for transport services.

Upon request, we can deliver parcels:
in PVC bags,
in individual cartons,
in collective cartons,
on pallets,
in any other way.

BULK **PURCHASING**

We invite wholesale customers to our headquarters, where you will see all models of Matpol Christmas trees and see quality, design and durability, guaranteed by us. Especially for this purpose, we have created a room where you can carefully see, touch, test and easily compare all Christmas trees. We look forward to seeing you soon!

If you cannot reach us in person, we can send you more photos. Or, even let us give you a virtual tour of our Christmas tree forest during a video conference.

Most of the trees are produced on an ongoing basis or specifically for your individual order. We only sell products from current year - we do not ship Christmas trees from long-term storage.

We offer over 50 unique models of Christmas trees!
